

Dear FCC,

As I look about all of the studies and read so many of the desperate reports of people whose lives have been ruined by the predictable consequences of over exposure to both Electromagnetic Fields and Radiofrequency/ Microwave Radiation, I can't help but wonder if the FCC simply has a death-wish in mind, for the unsuspecting public.

It is obvious from animal, plant and human studies that exposure to such "EMR" emissions (Electromagnetic and RF Radiation) are not only far from benign, but are actually quite hazardous -- and predictably so.

By this point in time, there is no way in the World, that the FCC can possibly pretend, that they do not know the harm, caused by such reckless distribution, of RF and other EMF sources.

The diabolical plan to heavily radiate every single man, women and child, in places of work, play and or/rest is beyond criminally insane.

The solution to the current Wireless mess is LESS of it -- NOT MORE.

Many are beginning to think that the FCC and the decision makers, that rubberstamp these maniacal plans are in effect, declaring war on the American Public.

As the Public becomes continually more informed of these "EMR" incursions on their lives and wellbeing, and further attributions are made between symptoms and causes, it will be unavoidable, to conclude that leaders at the FCC, made willful decisions to throw the American Public under the bus, to further a ravenous corporate agenda, that is neither sane, legal, nor moral.

The callous disregard, that the FCC shows to human safety and the Orwellian double-minded psychosis, that permits you to declare bogus safety standards, while simultaneously disavowing the responsibility to actually conduct safety studies, is beyond absurd.

And let's face it -- The Science is already in.

People are being harmed.

Taking the liberty to ignore both your critics and the independent scientists, that have blown the whistle on much of these hazards, since before the 70's, is just jaw-droppingly arrogant.

The joke will soon be over.

Much of the public already knows, that the ridiculous "thermal" safety standards, are complete bologna and the entire facade of safety, put forth by the FCC, is a malevolent ruse.

At the point where the American Public concludes after looking out their bedroom, school, and office windows that the FCC has ostensibly permitted the erection of bio-weapons, on every corner and upon every hill, you can expect sparks to fly.

PUT-THE-BRAKES-ON-THIS-PLAN-NOW.

The FCC pushed it with Wi-Fi everywhere, and with Smart Meters and Cell Towers, in far too many places.

If you continue in the delusion, that the Public will NEVER respond, to these endless encroachments on their well-being, you will awaken to the inevitable truth, that you miscalculated.

Even the contemplation of this 5G plan is insane.

I stand in vehement opposition to this hair-brained and outright evil plan.

We're watching FCC!

Whom do you truly serve?

You'd be better off quitting your post at the FCC, than selling out every man, woman and child in this country.

Please DO NOT GO FORWARD WITH THESE RIDICULOUS ANTENNAS.

SQUASH THIS NOW.

Best to you,

Mark Giordani
